## Section 2.1a/b - Exponent Basics, Multiplying and Dividing a Common Base

Write the following out as repeated multiplication (Variables are the same as numbers)

| 1. | $5^{4}$ | 2. | $(-2)^{4}$ |
| :--- | :--- | :--- | :--- |
|  |  |  |  |
| 3. | $-3^{5}$ | 4. | $-(-r)^{3}$ |
|  |  |  |  |
|  |  |  |  |

Will the following be negative or positive answers, why?

| 5. | $(-1)^{4}$ | $-(-1)^{5}$ |
| :--- | :--- | :--- |
|  |  |  |
|  |  |  |

Simplify using the Multiplication and Division Properties. Leave your Answer as a Base to an Exponent

| 7. | 8. | $(-3)^{4} \cdot(-3)^{5} \cdot(-3)^{2}$ |
| :--- | :--- | :--- |
|  |  |  |
|  |  |  |

| 9. $4^{7} \cdot 4^{3} \cdot 4^{-6}$ | 10. | $(-w)^{4} \cdot-w^{7} \cdot(-w)^{6}$ |
| :--- | :--- | :--- |
|  | $(-h)^{5} \cdot(-h)^{4} \cdot-h^{7}$ | 12. |
| 11. |  | $(-2)^{7} \div(-2)^{-3} \div(-2)^{6}$ |
|  |  |  |

## Self-Reflection:

I am feeling?

What can I do to make sure I am prepared for tomorrow?
