Name:
Section 2.1b - Proficiency Check - Multiplication and Division of a Common Base
Simplify entirely, leave answers as a base to an exponent $b^{e}$

| Emerging | Emerging | Proficient |
| :---: | :---: | :---: |
| $(-2)^{3} \cdot(-2)^{4} \cdot(-2)^{2}$ |  |  |
|  |  | $3^{3} \cdot 3^{6} \cdot 3^{2}$ |
|  |  |  |
|  |  |  |

| Proficient | Extending |
| :---: | :---: |
| $-2^{4} \cdot 2^{2} \cdot(-2)^{3}$ | $-(-2)^{4} \cdot 2^{-2} \cdot-2^{4} \cdot(-2)^{3}$ |
|  |  |

Simplify Completely, leave answers as a base to an exponent $b^{e}$

| Emerging | Proficient | Extending |
| :---: | :---: | :---: |
| $\frac{5^{5}}{5^{2}}$ | $\frac{-2^{5}}{(-2)^{3}}$ | $\frac{(-2)^{3}}{2^{-4}}$ |
|  |  |  |
